

UPLOADING INSTRUCTIONS AND GUIDELINES

INSTRUCTIONS

After registering, you can immediately upload files from your computer.

Once you are registered, you will be able to click on the “returning user” button. You will be prompted to enter your e-mail address before uploading new image files.

To upload multiple files, it is recommended that you compress them into a single file. Supported formats are **.zip**, **.rar**, or **.sit**.

Your file will be uploaded automatically into our art approval queue. We will verify that the image meets our design requirements and guidelines. The design will then be added to the website for our customers to choose as an option for their axewrap.

GUIDELINES

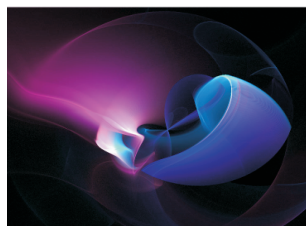

All designs must be designed to be 7:9 in ratio and be a minimum of **150 DPI** at a full scale of **14” tall x 18” wide**. (Full scale at 150 DPI would be 2100 pixels x 2700 pixels). It must also be **8-bit RGB**.

Guitars are fairly similar in shape. Please note that there will be portions of the design that will not be prominently displayed as is shown below:

**TYPICAL GUITAR BODY
SHAPE**

14” x 18” DESIGN

**GUITAR WITH APPLIED
AXEWRAP**

Most designs will be printed to a white vinyl. However, some designs can be created to be printed to a transparent vinyl which will display the finish of the guitar through the wrap. When designing images to be printed to transparent vinyl, the background color should be white as white does not print. If it is your intention to create a design for transparent vinyl, you must name the file with the word “transparent” as the first word of the file name.

If you have any further questions, please e-mail our art queue manager at aqm@axewraps.com
